

Mentorius — System Context diagram (C4 level 1)

Mentorius is a mentoring platform whose learning content is a) a pre-mentoring best-practices course and b) per-role development tracks (competencies with levels) that an AI facilitator scores from recorded mentoring sessions.

Mentorius — Container diagram (C4 level 2)

All containers run on Mentorius' private servers (on-prem, GPU nodes for the AI worker). Voice and text never leave this boundary except through the external systems shown in grey.
